

Unlocking the spatial dimension

Maximizing insights from spatial omics data

Join us for an in-depth webinar featuring the creators of molecular pixelation and leading experts in multi-omics & spatial data analytics

Louise Leijonancker
Field Application Scientist,
Pixelgen Technologies

Dr. Volodimir Olexiouk
Principal Scientist,
BioLizard

Dr. Viacheslav Mylka
Senior Bioinformatics
Scientist, BioLizard

Together, we will cover:

- Understanding spatial technologies & the novel biological insights they can bring
- Introduction to the pioneering molecular pixelation method for single cell spatial proteomics
- Analysis of spatial omics data & integration of different omics data types, illustrated by real-life case studies

PRACTICAL

 Zoom webinar

 May 29th 2024
